

NEUROTHERAPY

TREATMENT & TRAINING CENTRE
Neurotherapy By Nawal Kishore

ABOUT NEUROTHERAPY

“Dr. Lajpatrai Mehra’s Neurotherapy” . is a relatively New therapy which is an Alternative Medicineless Therapy, evolved by Dr. Lajpatrai Mehra, after intensive studies of human Anatomy, Physiology, Ancient Indian Sriptures and Research since 1945.

Neurotherapy (NT) is a medicineless, manipulative, Alternative Therapy. Though it has its roots in the ancient India scriptures, Dr. Lajpatrai Mehra has reoriented and has evolved the different aspects of Neurotherapy, namely-

- 1-The NT. Principles
- 2-The specific NT. Diagnosis
- 3-The specific language of NT. symbols
- 4-The different NT. Formulas for treating the different types of Ailments

Dr. Lajpatrai Mehra has succeeded in developing this therapy after intensive studies of diseases / disorders and correlating them to Anatomy & Physiology, then applying logically, the principles of his Neurotherapy to formulate the different Neurotherapy treatments to cure the various types of diseases. Further Research includes conducting trials on the patients by giving the newly conceived Neurotherapy treatment as prescribed in the new formula then evaluating the response in the term of relief experienced by the patients.

Neurotherapy is a unique blend of medicineless therapy and medical studies

The diagnosis includes specific Neurotherapy diagnosis and also medical reports like x-rays, ECG., Sonography, MRI-Scan pathological reports, etc

NT believes that the body suffers from an ailment because the biochemical balance of acids, alkalies, hormones, enzymes, antigens, antibodies is disturbed in the human system. The NT treatment restores this disturbed biochemical balance by stimulating the various organs to function normally to produce the required chemicals in optimum quantities. In Neurotherapy, pressure is applied to stop the flow of blood to the specific region of the body mainly with feet and occasionally with hands for a particular duration (6 seconds to 40 seconds.) and then released, so that blood flows with a greater force to activate or deactivate the correlated nerves / glands / organs. This may be repeated as per the requirements of the patient, so as to maintain homeostasis of the body’s biochemical forces, which in turn restores health.

Nt. treatments are effective in treating Asthma , Arthritis, colds, injuries, hormonal imbalances, mental disorders, menstrual disorders, sterility, blood & heart problems, Kidney disorders, multiple sclerosis, skin and digestive-system disorders, are just a few examples.

Nt. also emphasises on regulating diet and lifestyle Upto now lakhs of patients have been treated, thousands have been trained at Dr. Lajpatrai Mehra’s Neurotherapy Institute-Bandra-Mumbai & Neurotherapy Academy at Suryamal Ashram - Vada, Taluka Mokhada, District Thane, where students come from all over India and 600 Neurotherapy Centres have been set up all over India including London, Canada and Australia

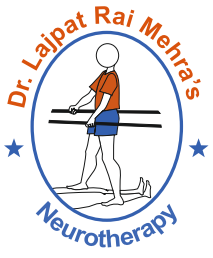

Mr. Nawal Kishore **Senior Neurotherapist**

President, Sewa Foundation Health NGO
